HOW WE WORK

We will keep in touch with you till the last moment.

Elite Virtual goes through several stages to complete the mission professionally

Consultation :

Our management team discusses the ideas of the event with the client. Then, they start planning and searching about the mechanism of its implementation, so that it will be carried out with high experiences

Developing the idea :

After the main terms are agreed upon, they will be integrated into conformity to the modern technologies, the using codes, and the safe payment methods, which make your event spread globally.

Working on the event :

After furnishing the ideas and formulating them as required, the event phase begins. The hosting phase, reserving a domain, and preparing a broadcast montage are fulfilled to organize your event.

Achievement :

The previous stages have to be integrated to get you in this stage, achievement. Here we deliver you a perfect and integrated project.

Receiving support :

We are fully prepared to give you all forms of support you need wherever you are and whenever you want.

OUR USED TECHNOLOGY

With Elite in our 3D environment making virtuality closer to reality

Live Streaming

Our Platform supports live video Streaming including attendee chat features.
So, attendees can ask their questions to the live event host.

3D Environment

To feel the real in our virtual events! We have the booths, halls, workshops, an imaginary environment that enables the visitor to move similarly to reality.

360 technology

Live feeds can power mixed reality experiences, Interacting with fellow attendees who live in virtual environments is a massive answer that VR gives to the eternal question, how can I attend if I can't make it in person, and that's our magical touch.

Chroma Key Setup

We provide you a stunning event using Visual-effects and post-production techniques for compositing (layering) two images or video streams together based on color hues (Chroma range) for a mind-blowing and interactive virtual event.
